

EXA Infrastructure Low Latency Connect

Speed Beyond Limits, Connections Without Bounds

Elevate your speed

EXA Infrastructure owns and operates the lowest latency transatlantic cable from New York to London. Our low latency network includes more than 60 unique routes and connections to major data centers and direct access to key Financial Trading Exchanges globally.

EXA Infrastructure's network is expanding into emerging business hubs and since we own and operate the largest and most advanced pan-European fiber network, we can help your business scale into new markets. With access to over 500+ PoPs, 34 Countries, 300+ cities, 151,00 kilometers of fiber network, 6 Transatlantic cables, 270+ Edge and network colocation sites, we offer the ultimate flexibility to configure and deliver the unique deployments meeting your requirements.

To meet broader network needs, our portfolio of infrastructure products includes:

- Dark fiber
- 10, 100 and 400G Wavelengths
- Ethernet direct
- Colocation facilities
