Colocation

Secure and Flexible as you would expect

EXA Infrastructure operates colocation facilities across Europe and North America, seamlessly integrated into our owned fiber network. Our offerings feature fully customized space and power solutions, allowing for ultimate flexibility in configuration, including industry-standard cabinets and cages. We also provide bespoke "land and power" packages tailored to unique deployment needs. Additionally, EXA Infrastructure offers remote hands and eyes, as well as comprehensive cabling services at all our colocation facilities.

Why EXA Infrastructure Colocation?

EXA Infrastructure offers modular and flexible colocation solutions tailormade to integrate with our expansive fibre network.

Benefits for the Client

Resilience and flexibility

- Standard and custom cabinets, racks, and footprints to suit your needs
- Private suites and cages to fit more demanding requirements
- Remote hands & eyes to support your business with our technical knowledge, so you don't have to
- Optimized cabling and cooling to ensure your cabinets have the right airflow and correct cable routing

Operational Support

- Managed Access and Physical Security
- 24/7 monitoring
- NOC and local field teams for fast repairs to provide high availability to our customers
- Remote Hands Services for on-site technical support

Geographic Coverage & Connectivity

- Seamless Integration with our network.
- Carrier neutrality with access to multiple providers
