

EXA 400G value proposition

Lower TCO

- Customer equipment is more cost effective and energy efficient
- Customer can achieve higher port densities within datacentre cabinets
- 75% lower patching & cabling costs

Simplicity

- 1 circuit replaces 4 circuits
- Faster installation, testing and turn-up
- Simplified troubleshooting

ESG

- More energy efficient
- Fewer materials and less waste
- Less transportation and packaging

Enabling customers to benefit from:

- Higher bandwidth density
- Lower equipment TCO
- Reduced complexity
- Lower environmental impact

65,000 km of network currently enabled

147 PoPs

71 Metropolitan areas

2x Transatlantic routes

Over 3,000 distinct A/Z route combinations

Continuous footprint expansion
